Secure Transport Frames For Immediate Dispatch

All exchange radiators have been treated to the same high quality workmanship. Each unit has been carefully stripped down, with all tanks, brackets and supports thoroughly cleaned before installing new Australian manufactured Heavy-Duty cores. Each unit has been carefully assembled using new high quality gaskets and hardware. Every unit has been thoroughly pressure tested then painted, ready for exchange or delivery.

If your make and model is not showing, please contact us as we have a wide variety of re-cores available.
